NOTES	Continued...		
	From British Museum Mar.11th.1844.	Government has agreed to publish the animals brought by Capt. Ross from the South Seas. I am going to describe the Macraelin. Could your Mr. Hawkins come to town for two or three weeks to lithograph them for me. Cannot send as they are very large and the rules of the Museum forbid me to do so.	
	Mar.12th.1844.	Referred to Thompson. Many Antelopes to be found in Abyssinia. Refers to Warwick, Ruppell. Will enquire if Dr. Falconer and Richardson as to the effect of Hodgson's removal upon Lieut. Smith. Busy at present publishing the animals brought home by Ross.	
	Mar.15th.1844.	Will require Mr. Hawkins before the 2nd April as I am going to Paris for 10 days. Warwick is open to any offer you may wish to make. Feared Hodgson's recall might have stopped the Indian expedition then thought of Blyth, but he may be too busy. Talk of Thompson going.	
	Mar.18th.1844.	Met Dr. Falconer he says the removal of Mr. Hodgson will not prevent Lieut. Smith doing what he has to do.	
	21st. Mar. 1844.	Seen Warwick, could come to no understanding, he will come again tomorrow. If he does not get a situation as keeper or something similar, will go to Abyssinia on his own account.	
	Mar.22th.1844.	Can give no information on Zanzibar. A German Naturalist Dr. Petros of Berlin intends to go go there from Mozambique, was in bad health and fear he may not last the voyage. John McGillivray has heard of last in Mr. Holland a year ago. Seen Warwick again no further progress. Will determine the Antelope when I have seen the drawings, do not know it by the name Gazelle var. Refers to General Hardwick. Yarnell pleased with Lears drawings.	
	Mar.23th.1844.	Hawkins drawings received, most satisfactory.	
	10th. April. 1844.	The Gazel that Blyth mentions is coming to Mr. Bartlett and is for sale., will enquire about price. Mr. Hodgson has left. Seen Warwick twice has not spoken of his trip to N.E. Africa.	
	Cataloguer	Received the Algor cannot say how it died. Thompson left the drawings and	Date

-- aviary of Zool. Soc. breaking up ?

7.10.1839. Zool. Soc. matters.

Offering to exchange a female Alprea and Whisking Duck for a pair of Roe Deer and a pair of Crinoes Geese. If agreed exchange to be made at Knowsley.

Jan. 12th. 1847. Pages 32 - 33. Thompson will be welcome but his journey will be as I have nothing to part with. Will have to wait for the next multiplication.

Jan. 16th. Pages. 34 -35. Have got the pair of Kangaroos, young Male and Female, the female is again with young. Shall send you the male. General information about his animals. Please make our arrangements in sending for the Kangaroos. Have a pair of Roman Pigeons spare.

Will be pleased to have the Kangaroos. My friend Mr. Chamberline our minister in Brazil before his death sent me a pair of Caracaras, on the passage one escaped and the other died of grief and I got only the head. Birds begining to lay eggs. Will visit Knowsley in the summer. Cannot visit Managaria at present as I have influenza.

Goats arrived safely at 12 o'clock last night. The Pittorgias are most welcome proof of your kindness, they are reposing under a heap of hay. The curcans cannot stand but hope it is only cramp after the long confinement, Armadillos are lively. Do you know how to tell the sex of the Emus, can only tell by their voice which does not develop for two or three years.

May 7th. 1844. Female Caracaras is excellent but the male is no good, has L.D.? a spare male to replace it.

May. 15th. 1844. Do what you think best, anything arriving at Newark will be sent to Shotton immediately. Note below states: The above relates to an interchange of some things between Knowsley and Shotton, there was doubt about the best way of sending them.
